

Curriculum Vitae

Resume

I have many years experiences delivering outstanding customer service in all roles I have served in. I am a can-do person; I see solutions not problems and I am pro-active.

I am looking for a role which means I can be active. In previous employment I have worked in a fast-paced environment, which I prefer.

I do use my initiative in delivering excellent customer service. For instance, a customer needed a part which was in short supply. I located one in a place my family and I were going to visit. So, I arranged to pick it up and deliver it to the customer at home, on our return to Norwich.

I am IT savvy. I have used different DMS programmes and use MS Word and Excel as well as Google equivalent.

I very experienced in stock management (using stock location systems), goods inwards and dispatching. I am also aware of Health and Safety, as I carried out Risk Assessments when in the parts department and for school trips.

I am punctual, reliable and of friendly disposition and will play a full role with-in the team.

Ian Williams

46 Norwich Road
Norwich
