I am an articulate, enthusiastic, and determined individual seeking a role which will enable me to utilize the skills I have gained through both formal education and being interested in gaming and animation. I can articulate and define the parameters for projects to a high standard and have strong articulate skills. I see myself as a highly motivated, result-orientated individual with a professional approach to delivering against set timelines and to the needs of my employer. I consider my ability to work in a team and commitment to meeting targets and set objectives to be my personal strengths.

I recently came out and have started to socially transition in preparation to change my gender through HRT when that is available and an option for me. So, I am well versed in the LGBTQ+ area. Saying this, I also managed to get the transitioning at work policy revisited and reworked while at my time at screwfix as it was almost 10 years out of date.

NCS award (National Citizen Service) I got this in June 2013 after 3-week participation in team building, survival knowledge (map reading, 17-mile hike, wood crafting, tent building & cooking a variety of raw foods) and helping out the local community in some way.
