

Luke John Whitehouse MSc, BSc (Hons.)

Address: 47a Bond Street, Dereham Road, Norwich, Norfolk NR2 3TS

Mobile Number: 07923502329

Email address: lukiepudding@gmail.com

Education

2021- 2022 ***Anglia Ruskin University, Cambridge***

MSc Applied Wildlife Conservation– Pass

2016-2020 ***Anglia Ruskin University, Cambridge***

BSc (Hons.) Marine Biology, Biodiversity and Conservation – Upper Second Class (2:1)

2013-2016 ***East Norfolk Sixth Form College, Bradwell, Norfolk***

A-Levels: Environmental Studies (B), Geography (C), Geology (C), History (D)

2007-2013 ***Lynn Grove VA High School, Bradwell, Norfolk***

11 GCSE's

Previous Employment

Odeon Cinemas - November 2025 - Present

As a Cinema Assistant I was tasked with hospitality duties, checking screens for illegal recordings checking customers tickets, distributing 3D glasses as well as helping customers at kiosks and in other areas to make sure their experience at the cinema was enjoyable, including those with disabilities or hidden disabilities, by guiding them to screens if required or suggesting subtitled or autism friendly screenings. I also am fully till trained and trained on serving guests food and beverages, directing customers to the best possible deal in the establishment in a calm and polite manner.

Norfolk and Norwich University Hospital Microbiology - February 2025- October 2025

In Microbiology, I learnt how to process and number microbiology specimens for processing in the bacteriology laboratory. This included sorting, debagging, labelling, numbering, and booking in received samples. I also learnt how to deal with biological waste with regards to laboratory health and safety and book in urgent samples such as blood cultures or joint fluids/tissues.

Cambridge University June 2023- October 2024

My role at Cambridge University was as a Junior Animal Technician. My main duties were to perform daily checks on the care and welfare of each animal kept in the facility. That included making sure each animal had accurate cage labels, access to food/water and any signs of illness or change in behaviour were documented with researchers contacted. I gained experience keeping accurate records as all animal information was recorded on the University's animal management system, meaning any issues or changes could be documented and accessed by the researcher for their study. I also cleaned the laboratory and replenished any stocks daily, making sure that it was clean for use by any other animal technicians. I also learnt how to wean animals and provide any with supplements to manage any specific dietary requirements.

Addenbrookes Hospital May 2023-June 2023

At Addenbrookes, my role was sorting, quality assuring, booking in and transporting patient samples for onward testing. The role also required considerable PC work inputting patient and testing data to the Hospital system. It was a fast-paced environment, meaning there was quite a demand for accuracy and efficiency of data input.

Earlham Institute (January 2022- March 2022)

I worked shifts at the Earlham Institute assisting with the Loop-Mediated Isothermal Amplification (LAMP) testing for NHS staff. My roles included sorting, labelling, and scanning collected saliva samples so that they could be tested using the Loop-Mediated Isothermal Amplification process to check whether NHS staff had Covid-19.

I worked in specimen reception where I was trained in accepting, registering samples, and uploading them to NHS Lantern. I have been trained in utilizing the microbial safety cabinet to process specimen bags, decontaminate and the formation of varying concentrations of chemical decontaminant reagents. This included error logging spilled or leaking samples, disinfecting workstations and the fume cabinet with chemgene, and disinfecting the collection boxes/bins so that any spilled or leaking samples could be prevented from transferring Covid-19.

Norfolk and Norwich University Hospital NHS Foundation Trust (June 2021- April 2023)

My role at the Pathology Lab at the Norfolk and Norwich University Hospital was as a Biomedical Science Support Worker for the Eastern Pathology Alliance. My role was to sort collected blood samples of patients so that they can be relabelled, indexed, booked in, and sent to other

departments. I have also been taught how to centrifuge samples to prolong their shelf life and have acquired pipette training.

B&M Stores Neatmarket (October 2020 – February 2021)

As a member of the replenishment team, I was tasked with restocking the shelves, unloading pallets, facing up the store then sweeping/cleaning, making the store look presentable.

Vue Cinemas Cambridge (August 2017- August 2020)

As a Customer Assistant, I was tasked with hospitality duties, as well as checking screens for illegal recordings. I also sold tickets to customers as I am fully till-trained, as well as popcorn and other cinema foodstuffs and provided the best possible deal in the establishment.

Rosy Lee's Tearoom, Norfolk (January 2016 – September 2016)

I was a waiter (till-trained), I served customers by taking their orders and preparing and serving food and drink.

Pleasurewood Hills Theme Park, Suffolk (March- October 2015)

I worked as a Photobooth Attendant (Retail and till-trained), creating happy memories for guests by printing photos that were taken on the ride and placing them into keyrings, fridge magnets, or photo frames, taking pride in providing excellent customer service.

Key skills

Full Driving Licence – no penalty points, Marine Biology, GIS skills, R analytical software, Laboratory skills, Research and field skills, Data collection and analysis, Open Water Diving up to 18m, conducting an environmental impact study, Customer Liaison, Public Speaking, Team player, Till Training, Leadership skills, Engaging people with science, Critical thinking skills, complex problem-solving abilities, writing and speaking skills.

Personal Achievements

- Full UK driving licence with no penalty points
- PADI Open Water Diver's licence and am licenced to dive up to 18m
- Treasurer (and previously Administrator) of Anglia Ruskin's Fandom Society from 2017-2020
- Participated in the Anglia Water Waterwise Challenge – awarded the bronze science CREST award in 2010/2011

- Adventure Cadets (2007-2013) – Ordinary Cadet to Cadet Petty Officer
- Prefect at Breydon Middle School (December 2007- July 2008)

Voluntary Employment

St John's Ambulance, Gorleston Division (September 2011- July 2015)

I learnt different types of First Aid from simple cuts and burns to how to perform CPR and use a defibrillator, I learnt many different certificates in lots of activities from training days to competitions. I also went on duty at the local theatre several times to help support the adult First Aiders if the cause ever arose.

RSPB Young Warden at Minsmere RSPB Conservation Centre, Suffolk (April 2015 – September 2015)

I learnt about ornithology- bird species and identification, Wetland conservation and maintenance of the site and I learnt how migration patterns were monitored as well as which bird species were indicators of changing seasons.

Friends of Horsey Seals, Horsey Gap, Norfolk as a Seal Warden (September 2015- 2017, September 2020- February 2021)

As a Seal Warden my job was to prevent the public and their dogs from getting too close to the seals during their birthing and breeding season throughout the winter. I also talked to the public, educating, and informing them about the seals and their habitat, answering any questions they had and relaying information to both adults and children.

Norwich Science Festival Volunteer for the UEA Biomedical research centre, Norwich Research Park, and BRIO (Broccoli in Osteoarthritis) Clinical Research Trial, as part of the Food Sciences Festival (19th October 2019)

My role as a helper at the BRIO Clinical research trial and Clever Foods Trail was to enthusiastically encourage families to take part in learning about different parts of a balanced diet and direct them to Dr Rose Davidson at the main stall if they had more questions about the BRIO study – a clinical research study- on the effects of broccoli on osteoarthritis.

Feedback from the team leader (Dr. Rose Davison) was that I was a sociable, energetic personality, with an enquiring mind and a willingness to help make science an inspirational experience for everyone.
