Multi-skilled Engineer

REBECCA ALLITT

PROFESSIONAL SUMMARY

Multi-skilled engineer with IPAF Level 3a and Level 3 Health and Safety certifications, demonstrating strong technical proficiency and commitment to workplace safety. Experienced in applying engineering principles to optimize operations and ensure compliance with health and safety standards. Focused on delivering innovative solutions that enhance efficiency and promote sustainable growth.

WORK EXPERIENCE

Feb 2025 – Present

Multi-Skilled Engineer - Cranswick Country Foods , Watton

- Installed and maintained mechanical and electrical systems to ensure continuous operational reliability and minimize downtime.
- Executed preventive maintenance programs that improved equipment lifespan and compliance with safety standards.
- Diagnosed and resolved technical faults promptly to enhance system uptime and reduce service interruptions.
- Collaborated with cross-functional teams to optimize workflows, improving overall productivity and process efficiency.
- Developed and implemented safety protocols that reduced workplace incidents and ensured regulatory compliance.
- Calibrated and tested instrumentation to maintain accuracy and support consistent operational quality.
- Coordinated equipment upgrades and installations to align with evolving project requirements and technological advancements.

Sep 2021 – Feb 2025

Multi-skilled Engineering Apprentice - Greencore

- Installed and maintained mechanical and electrical systems to ensure operational reliability and compliance with safety standards.
- Tested equipment functionality and identified faults promptly to minimize downtime and enhance system performance.
- Repaired and calibrated machinery components, improving accuracy and extending equipment lifespan.
- Collaborated with cross-functional teams to optimize maintenance schedules, increasing overall productivity and resource utilization.
- Documented technical procedures and maintenance activities to support quality control and regulatory audits.
- Monitored workplace safety practices, ensuring adherence to protocols and reducing risk of accidents.
- Assisted in implementing process improvements that streamlined workflow and boosted team efficiency.

Jan 2020 – Sep 2021

Residential Support Worker - Unique Homecare Services Ltd

- Administered daily living assistance to residents, ensuring safety and promoting independence within the residential environment.
- Monitored and documented behavioral changes to maintain accurate records and support individualized care plans.
- Collaborated with multidisciplinary teams to coordinate personalized interventions, enhancing resident well-being and engagement.
- Implemented crisis intervention techniques to de-escalate incidents, maintaining a secure and calm living space.
- Facilitated skill-building activities that fostered resident autonomy and improved daily functioning.
- Maintained compliance with regulatory standards through consistent safety checks and adherence to care protocols.

Jul 2019 – Dec 2019

Hot Tub Maintenance - Tattershall Lakes- Away Resorts

- In my capacity as a Hot Tub Maintenance personnel at Tattershall Lakes, my primary responsibility entails maintaining the cleanliness and safety of all hot tubs within the park. This encompasses regular

monitoring and adjustment of chemical levels to meet specified standards, as well as the thorough cleaning, emptying, and refilling of hot tubs in preparation for incoming guests. Additionally, I ensure guests are satisfied with their hot tub experience and are well-informed about its operation. Beyond hot tub maintenance, I strive to enhance guests' holiday enjoyment by promptly addressing any concerns they may have and resolving any issues that may arise. Within this role I also assisted with changing of mechanical components such as motors and pumps.

SKILLS

- IPAF certificate- Level 3a
- Level 3 Health and Safety
