Personal statement

I am professional and conscientious team member with many years of experience in the administrative field, as well as being a good, friendly communicator with positive service user and colleague rapport. I respect and value everybody I work with, am a good team worker as well as working to my own initiative. Daily tasks and duties are undertaken professionally and to high standards. I possess a very polite and clear telephone manner.

We all aim to get it right and I believe supporting each other as well as understanding the strict needs for data protection and confidentiality are key factors in any role. I was previously responsible for running the Plastic Surgery Department and booking patients in for the consultants to carry out their operations, updating the databases; liaising and communicating with relevant teams on a daily basis.

I am a very competent and reliable individual. Having worked in the Mental Health field just shy of eleven years; I gained a good understanding of the

processes and clinical caseloads of my colleagues and the time frames in which the key principles were needing to be adhered to. I have no quarrels working collaboratively with people from different disciplines and cultures. I enjoyed organising and joining the clinicians in the anxiety workshops and discussing plans and tools which the parents and their children could learn. I also worked for the Systemic Family Therapy Team, assisting with the setting up of the clinics, video and audio systems; as well as maintaining the CORQ scoring of questionnaire results.

I understand the strict importance of confidentiality, the Freedom of Information Act 2000, and the Safeguarding: Adults and Children (Section 11 of the Children Act 2004). I enjoy working positively, respectfully and together with colleagues and organisations, to ensure others needs are met and supported.
