

Summary:

A highly adaptable and motivated professional with over 5 years of experience in operations, logistics, and IT systems. Skilled in optimizing processes, ensuring quality, and leveraging technology to drive efficiency. Proven track record in both team and independent settings, with a strong focus on detail and reliability. Currently seeking opportunities in the UK market to apply my expertise in operations and IT.

Experience:

General Operative , Lotus Cars Limited

Norwich, UK - 09/2022 to present

- Preparing and inspecting parts before the chassis assembly process.
- Enhanced quality assurance in chassis assembly by conducting thorough inspections, ensuring compliance with industry standards.
- Checking the presence of all necessary bolts (nodes) in the completed chassis.
- Actively participating in the vehicle assembly process, ensuring full compliance with company standards, engineering specifications, and production technologies.

Head of Control Centre, Agricom Group

Kyiv, Ukraine - 02/2022 to 08/2022

- Organising and assigning work based on priority to the dispatch control department, scheduling dispatches whilst considering peak loads, seasonality and targets. Completing the administration of control system software. Reduced errors by 20% through improved inspection processes.
- Overseeing training and implementing business processes throughout the development of the dispatch direction.
- Creating resources for the department in control of PMM / TMC as well as organising the automation of work for the dispatching direction and control of logistics. Successfully automated dispatch systems, improving efficiency by 50%.
- Managing people of 7 persons.

Senior Control Inspector, Harveast Holding

Kyiv, Ukraine - 07/2019 to 02/2022

- Managed the operation of equipment and transport using installed equipment (GPS, counters, sensors, CCTV etc.), monitoring deviations in route, unauthorised parking, equipment downtime and location in the event of loss of communication. Also monitoring fuel distribution/consumption and tracking the purposeful use of passenger cars within the enterprise.
- Reviewing the quality of the production processes performed and the quantity of cultivated hectares (sowing, fertilisation, plant protection products, soil treatment) and controlling the mixing of solutions.
- Checking the correct closing of completed works on the accounting systems software (1C) and compiling daily, weekly and monthly reports.
- Help with managing people up to 15 persons
