PROFESSIONAL SUMMARY

Results-driven Customer Service & Collections Specialist with hands-on experience providing quality assistance in a busy contact centre environment. Proven to be competent in handling all queries on overdue payments, complaints, and complex issues relating to customer inquiries, while showing empathy and professionalism. Skilled in negotiation of payment solutions, maintaining accurate CRM records, and meeting KPI-driven targets for quality, recovery, and customer satisfaction. Technical capability, very organized, with a commitment to the provision of fair, sustainable outcomes that protect both customer experience and business performance.

EXPERIENCE

10/2024 - current

Customer service assistant

Tesco | Norwich, UK

- Provided on-floor guidance to colleagues and new staff to help them use the internal store systems effectively.
- Stock data was recorded and tracked using digital tools to improve accuracy and operational efficiencies.
- Provided clear support and problem-solving for customers and colleagues queries.
- Assisted in maintaining standard procedures and reporting to ensure smooth store operations.
- Worked in a **time-critical, high-volume environment**, managing competing priorities and meeting daily deadlines.

12/2020 - 08/2024

Order Entry Associate

EXL Service | Gurugram, India

Provided end-to-end customer service support to Latham Pool customers by acting as a key contact for enquiries about billing, concerns about payments, account issues, and complaints about the service. Was working in a high-volume

- Strong foundation in databases, user interfaces, and software development.
- GPA: Merit

CERTIFICATION

- DataCamp - Data Analysis in Python, SQL Fundamentals, Excel, and Data Visualization in Power BI.
- Coursera - Operational Risk Management (Basel Frameworks).
- DataTrained - Machine Learning

contact centre environment, consistently meeting the quality, productivity, and customer satisfaction KPIs.

Key Responsibilities :

- Addressed customer inquiries for both inbound and outbound communication, including payments, using the phone or email.
- Assisted customers who had outstanding accounts by explaining charges and working with them to find acceptable solutions where necessary.
- Handled sensitive and tricky communications effectively, remaining professional and upholding business considerations as well as cash flow.
- Ensured correct coding of customer interactions, payment terms, and resolutions in CRM systems, taking into account audit trail principles.
- Monitored customer accounts for overdue balances and acted promptly to address any potential issues that might have escalated.
- Handled resolved complaints at the first point of contact whenever possible and escalated complex and high-risk contacts in accordance with company policies.
- Adhered to strict data protection guidelines, compliance, as well as service standards, thus ensuring safe management of customer data.
- Met and maintained goals in processing calls in relation to quality assurance, customer satisfaction, and time to resolve.
- Worked very closely with various in-house teams to share information, enhance processes, and provide customers with a seamless experience.
- Involved in continuous training programs to improve knowledge and skills in products, system familiarization, and communication.

Key Achievements:

- Regularly achieved and exceeded targets for quality and customer satisfaction.
- Strengths in patiently and understandingly dealing with difficult customers.
- Added to the resolution of issues by pointing out areas that needed process changes.

PROJECTS

Zoho CRM Optimisation -(Korutek Engineering)

- Delivered hands-on CRM training to 15+ staff, developing step-by-step user guides and manuals, resulting in a 30% reduction in user errors and support queries.
- Reconfigured CRM workflows and data entry rules, improving data completeness and consistency by ~25% across key records.

- Translated user requirements into **system enhancements**, increasing **user adoption and process efficiency**, with **measurable improvements in reporting accuracy** – directly relevant to structured platforms such as **Salesforce In-Form**.

Predictive Analytics Dashboard - UK Crime Data

- Cleaned, merged, and validated **100,000+ records** from multiple data sources using **Python (Pandas)**, improving data reliability and readiness for analysis.
- Built **interactive Power BI dashboards** to visualise key trends and risk indicators, reducing manual analysis effort by **30%**.
- Explained analytical insights to **non-technical peers and stakeholders**, enabling **data-driven discussions and informed decision-making**.
